Sex: Filly

Brands (Left): MTP

Brands (Right): 2 over 3

20th September 2024

Dear Darren & Liz,

I certify that on Friday, 20 September 2024, I examined the above described horse for general health and insurance purposes to enter thoroughbred syndication.

The heart & lungs were found to be normal upon auscultated and the eyes were examined & appear to be normal. This filly does not have parrot mouth. There is no evidence of previous abdominal incisions, laminitis or any infection/disease.

The horse was examined at the walk in a straight line & no lameness was observed. Flexion tests were not performed on this occasion.

The horse is in great condition for her age with a normal body condition score.

In my opinion at the time of examination, "Foxlago X Toronado 23" presented as suitable for syndication.

I hereby confirm that I do not have any current or intended future financial or any other interests in the above said horse or proposed syndication.

Please don't hesitate to contact us at the clinic if you have any further queries or concerns.

Kind regards

Dr Jade Janssens
